

TOMOKI OKUNO

PhD Candidate in Biostatistics, University of California, Los Angeles (UCLA)
+1-424-341-8052 | tomokiokuno0528@g.ucla.edu

RESEARCH INTERESTS

- Statistical machine/deep learning for precision and preventive medicine
- Quantitative aging and longevity: DNA methylation biomarkers, causal modeling
- Causal inference & high-dimensional methods

EDUCATION

University of California, Los Angeles (UCLA)	Los Angeles, CA
PhD Biostatistics; GPA: 4.0/4.0	Expected 2027
MS Biostatistics; GPA: 4.0/4.0	2023
Kyoto University	Kyoto, Japan
MS Informatics	2013
BS Engineering, Applied Mathematics and Physics	2011

AWARDS AND HONORS

Japan Student Services Organization Scholarship	2023–2027
UCLA Departmental Graduate Fellowship (tuition/fees)	2023–2026
UCLA Wilshire Fellowship in Geriatric Medicine	2022

PUBLICATIONS

- 4 first-author publications: Diabetes Care (2025), Journal of Diabetes Science and Technology (2025), Diabetes Technology & Therapeutics (2024), Diabetes (2023)
- 1 co-author publication: eBioMedicine (2025)

See [Google Scholar](#) for details.

RESEARCH EXPERIENCE

Department of Biostatistics at UCLA	
Graduate Student Researcher, Advisor: Dr. Jin J Zhou and Dr. Hua Zhou	2022 – Present
• Conducted differential expression analysis with patients' genetic data to predict dysfunction after lung transplantation using Random Forest with time-varying covariates • Examined the relationship and consistency between data extracted from the electronic health record in the US Veterans Affairs and continuous glucose monitoring data from Dexcom • Identified real-world, long-term (temporal, seasonal, monthly, and weekly) glycemic trajectories in type 1 and type 2 diabetes from wearable device data • Examined the association between continuous glucose monitoring device-metrics and all-cause mortality • Investigated the association of both short-term and long-term glycemic variability with the development of microalbuminuria for type 2 diabetes patients using survival models	

TEACHING EXPERIENCE

Department of Biostatistics at UCLA, Teaching Assistant
• BIOSTAT 203B: Introduction to Data Management and Statistical Computing (2022-2024 Winter) • BIOSTAT 216: Mathematical Methods for Biostatistics (2023-2024 Fall)

- BIOSTAT 401: Data Science Capstone (2025 Spring)

CONSULTING & INDUSTRY EXPERIENCE

Medley Inc. (TSE-Mothers)

Tokyo, Japan

Business Development and Promotion Specialist, Business Enablement Group

2019 – 2021

- Led a 10-member cross-functional team to design and roll out end-to-end processes (sales → contracting → billing → customer support) for a web-based medical questionnaire product; onboarded 200+ clinics in six months
- Built strategic partnerships with medical product manufacturers and distributors, launching cross-sell programs that opened new revenue streams
- Drove inter-departmental operations projects; clarified objectives, KPIs, and risk controls to improve process reliability and transparency
- Conducted market and product due diligence for clinic-facing solutions and translated findings into requirements for commercial and operations teams
- Co-designed and negotiated a public–private telemedicine pilot with the Okinawa prefectural government, delivering services to Yonaguni Island (population ~1,700; one medical facility) and establishing a blueprint for rural deployments

Freelance

Tokyo, Japan

Business Consultant

2018 – 2019

- Collaborated with an e-commerce company and a tax accounting firm
- Managed an e-commerce database of 50,000 stores and led a large-scale system migration; set revised operating costs for the new system
- Built an asset allocation simulator using client profiles; automated data input, analysis, and reporting to cut operating costs and improve sales efficiency

Japan Football Association

Tokyo, Japan

National Football Team Marketer

2016 – 2018

- Developed a marketing strategy for JFA; coordinated with ad agencies and JFA sponsors
- Delivered >10% year-over-year fan growth through an engagement program; introduced experiential content to deepen attachment to the National Team
- Built k-means fan segments to surface needs; translated insights into clear targets and campaign objectives
- Planned and executed 2018 FIFA World Cup programming and marketing; secured 10 sponsors and doubled the budget vs the previous World Cup

Accenture Japan Ltd.

Tokyo, Japan

Strategy Consultant

2013 – 2016

- Led 10+ strategy projects across governments and global retailers
- Government: modeled nationwide municipal workloads/costs and secured a 20% increase in baseline compensation
- Government: analyzed Australia/New Zealand programs and drafted a new visa framework to extend high-net-worth visitor stays
- Major retailer: built price/volume forecasting and ROI models; optimized store network and justified doubling the digital promotions budget.

SKILLS

- **Core Strengths:** Project leadership & ownership, End-to-end program management, Objective decision-making, Precision & high-quality deliverables, Problem solving, willing to rework when evidence demands
- **Methods & Expertise:** Survival and longitudinal analysis, Semiparametric causal inference, High dimensional machine learning; Bayesian hierarchical modeling, Orthogonal and doubly robust estimation
- **Computing Skills:** R, Julia, Python, SAS, Google BigQuery, Quarto, R Shiny, R Markdown, LaTeX
